Massage mode (1) Pushing and scrolling

Relieve pains, fatigue and weariness and return muscles to their original state.

Effectively relaxing weary and uncomfortable muscle tension, relieving muscle ache and stress. Special designed deep laver muscle stimulation waves can strengthen muscles, help manage health and reduce waistline.

Recommended pad placement

Massage Mode (2) Rapid Patting

Increase blood circulation and promote better health

This mode imitates rhythmic pounding of Swedish massage known as Tapotement.

With repetitive strikes that can help tap exact pressure points, increase blood flow and strengthen your immune system.

Massage Mode (3) Massage Chair

Sooth and stretch out your muscles so you can relax after an intense workout.

This massage program shifts from a soft and light touch to a deep and intense massage. It's one of the popular mode to effectively stretch out and sooth your muscles after a long day. It helps promote metabolism, eliminating lactic acid buildup and helping you recover faster.

Other Considerations

- 1. Results from UGYM Pro may differ from person to person.
- 2. Please follow doctor's instructions when using UGYM Pro if you are currently undergoing physical therapy. Visit a doctor from time to time to better understand the recovery progress.
- 3. If any skin allergy or irritation is caused by the pad gel, stop using UGYM Pro immediately and consult a doctor

Massage (4) Muscle Training

Efficiently increase muscle strength and density to reduce body fat

Side Thigh

Combine muscle trainingstimulation with physical exercise can increasemuscle contraction rate and intensity to helpbuildup muscle much faster with less chance ofgetting injured

Recommended pad placement

The actual feeling of stimulation intensity relies on pad locations, physical condition, size of electrodes, distance between each electrode and personal sensitivity.

Please drink 500cc of warm water after each massage session to keep muscle cells hydrated during recovery and speed up metabolism of waste product.

Quick Guide

- 1. Thoroughly wash and dry the skin, snap the black or red lead to the electrode clip button, slowly pull electrode off the clear plastic sheet by grabbing its ear, apply electrodes flat to the skin. Make sure no electrodes are overlapping. Uneven electrodes will affect the desired stimulation
- 2. UGYM Pro has 4 massage modes to choose from. Select the mode that fits you best and raise the intensity level where you find most comfortable. Be careful not to raise the intensity level too fast as overloading intensity may cause muscle cramps or tear.
- 3. Every massage session lasts for 30 minutes and will stop automatically. If you change the massage mode during previous session, the timer will restart for 30 minutes
- 4. If you want to remove electrodes during massage session, remember to press reset button or switch to the lowest intensity. (Reset button is located next to "+" button)
- 5. Keep in mind you can use your smartphone to control the device remotely. (Bluetooth version only)

Troubleshooting

Device has suddenly stopped during session.

- 1. Check to see if the battery LED display is blinking in orange. The device may need to be charged.
- 2. Check to see if electrodes are falling off the skin: one of the leads has got disconnected; or if the lead cord jack got disconnected from the device
- 3. Check the lead cord for cracks, tears or other possible damages.
- 4. Every massage mode lasts for 30 minutes and the device will automatically turn off.after 60 secodes with no further action.
- 5. If your device is overheating or malfunctioning, it will automatically power off.

How to reset the device if it's malfunctioning?

1. Leave it for a day and it will become normal again.

- 2. Let the battery drain and recharge the device again. (May take couple davs)
- 3. Charge the device for 10 minutes and unplug the micro USB cable.

Embedded 3200mA Lithium Battery

U-GYM has a battery life up to 8 hours. Depending on the program and intensity selected, the battery life may vary from person to person. Through the USB port, U-GYM can also be used as an external battery to charge other electronics. When the device is fully charged the LED will display green. As the battery life diminishes, it will blink orange. All functions will shut off during charging.

*** Warning

- Do not use U-GYM in temperatures above 37°C.
- Do not put U-GYM in or around fire.

About Electrodes (Pads)

- 1. To avoid dermatological infection and for hygiene purpose, please use dedicated pad for each person.
- 2. Please keep the water-based gel on pad clean and avoid direct touching. 3. Place the pad on clear plastic cover to avoid contamination and extend life after use.
- 4. Please keep pads under shade and avoid high humidity and direct sun light. Recommended storage condition: Temperature <28°C and humidity 50+5%
- 5. The average pad usage life is around 30~40 times (roughly 3 to 4 weeks) depending on personal hygiene, skin condition and how many times use per day.

Electrodes and lead cords are consumables with limited life expectancy and no warranty provided.

Electrode Usage Guide

Empowering Muscle Strength U-GYM Pro Smart Deep Tissue Muscle Massager

If you are acutely ill, please consult your doctor before using U-GYM.

- With pacemaker implant or cardiac dysfunction
- With hypertension, cancer or diabetes.
- With body temperature over 38°C, acute inflammation or in frail condition.
- With muscle sprain, strain or in acute pain.
- Under pregnancy, had given natural birth within 6 months, or had caesarean section within 1 year.

Product Specifications:

U-GYM Weight: 150g Dimensions : 128mm(L) x 63mm(W) x 17mm(H) Embedded : Bluetooth module, 3200mAh Lithium battery Included : User manual, 2-electrode cord, 4-electrode cord, micro USB charging cable, Storage bag, electrodes (size and quantity vary between models)

When travel by air, please keep UGYM Pro in the carry-on as it is also a power bank.

Our smart deep muscle sport massager lets you relax and relieve muscle tension anytime anywhere. Sleek and portable design makes UGYM Pro extremely easy to carry alone and allows users to use it at home or on the go.

UGYM Pro uses medium frequency stimulation between 4000-8000 Hz that can penetrate deep subcutaneous muscle tissue, stimulating deeper nerves and pressure points to effective relieve muscle sore, pain or stiffness.

Our unique and unprecedented digital massage technology can make you feel deep layer stimulation similar to a traditional massage or acupressure performed by masseuse. This is what separates U-GYM from other low frequency stimulators, TENS and STIMs. Low frequency TENS unit only stimulates as deep as the epidermis which can leave you with uncomfortable stinging feeling.

UGYM Pro connects to smartphone through embedded BLE module to expand more functionalities. With U-GYM Smart Massage app, supporting both iOS and Android, you can design your own muscle training programs or preferred massage and share it with friends.

U-GYM Smart Massage app has functions like: Info, Self-defined Massage, Massage Sharing, New Massage Download, Facebook and Airsig login. You can even experience more massage modes and control the device through the smartphone app.

NCC Notice

According to NCC regulation for low frequency and radiation electronics section 12: Company, business and end user can not alter frequency, enhance power or change original certified design and functionality without official authorization; section 14: Low power radiation electronics cannot be used to affect flight safety or interfere with approved communication and should stop using the electronics immediately if situation appears so

This device complies with part 15 of the FCC rules. Operation is subject to the follow Two Conditions. (1) This device may not cause harmful interference and

(2) This device must accept any interference received including interference that may cause undesired operation

Operation Instruction

1 Set up and get started

Snap the cord lead to the electrode clip button, make sure the lead is firmly attached to the center of pad.

Applyingelectrodes on skin 2

Place the electrodes on the muscles based on your personal preference. Note that always apply the electrodes on skin before activating the device.

Connecting cord to device 3

Insert the cord connector into the jack on the bottom of the device. Make sure it is fully inserted in to the jack.

A Powering on

Press and hold down the power button for 0.3 second (located on the upper right of the device) UGYM Pro will vibrate once and the LED display will illuminate. Now your device is turned on.

(5) Selecting massage mode

Press the mode button (there is a square mark on the button)on the front of the device to cycle through 4 modes (M1 to M4). Other than the original 4 massage modes, we are constantly researching and developing new modes which are available for download through our UGYM Smart Massage app.

6 Changing massage intensity

The two buttons on the left side of the device marked +/- allow you to control the intensity of your massage. In total there are 26 levels of intensity marked by the array of LED lights. One LED light indicates two levels of intensity change.

Pausing during massage

During massage session you can press the pause button (right above the + button in square shape) to pause stop the device. This will start a new massage session, which means your massage timer and selected intensity will start over from beginning. If you leave device idle for 60 seconds, it will automatically turn off.

8 Powering off

To power off your device simply hold the power button for 2 seconds. There will be two vibrations and the LED display will fully diminish to indicate the device shut off process. When finish massage session, kindly put the electrodes on clear plastic sheet and store it in cool and dry place to insure the maximum amount of uses

Use U-GYM Smart Massage app

1. Download and Install app

Just use keyword "UGYM" in app store and you should find UGYM logo. Please download and install the app in your smartphone.

2. Activate the app

Once you open the app you will see the login screen (right). You can either use Facebook login or Airsig login.

When using Facebook to login, make sure the Facebook account is already login, the app will take you to Facebook login page and select "Use Facebook to Login" and click "Confirm" to continue. The app now will take you to the main page. (Note

that if you are inactive for 5 minutes, you will be logged out.)

When using Airsig to login the first time, the prompt will lead you to setup a signature. Please think of a name at least 6 characters such as "Franky", picture that word in your head and keep your thumb on the screen and hold the phone like a wand to write the word as if you are writing on the wall with the tip edge of your phone. Once it's setup, it will take you to the main page. (Note that

if you are inactive for 5 minutes, you will be logged out.) 3. Pair and control device You will need to pair the device to update the firmware or control the device.Press the upper left corner and click on "Settings" and click on UGYM Paring. Now you see a
